-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 07 June 2010.  
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Carney Jr (US 6,178,714).

Regarding claim 1 (US'714 teaches of a one story high block with an interior wall an exterior wall and sidewalls (See 11, Fig. 2). The steel reinforcements can be seen (See 3, Fig. 2 which pass through holes). US'714 also teaches of a hollow space (See holes 12, Fig. 2) formed in between the walls.

Regarding claim 2, the exterior wall can be stamped to achieve any desired visual affect, as building exteriors often comprise stamped concrete or some sort of visual effect.

Regarding claim 3, the building block is capable of containing an opening such that it could accommodate a door or window (See example Fig. 17) as it is often desirable to create openings for windows or doors in building walls.

### ***Response to Arguments***

3. Applicant's arguments filed 6/7/10 have been fully considered but they are not persuasive. The prior art teaches of the critical elements, as claimed.

4. Applicant argues that Carney does not teach of a "one story high building block".
5. Examiner respectfully disagrees. It is completely subjective how tall "one story high" is. One story can vary from a toy house, to a shed, to a residential building, to a commercial building, etc. The point is that Applicant's claim does not delimit the invention to a narrow focus. Furthermore, sizing a block to a desired size would be considered obvious to a skilled artisan.
6. Applicant argues that item 3, Fig. 2 are not steel reinforcements.
7. Examiner disagrees. Whether temporary or not, the rods are made of steel (as disclosed by specification of the prior art) and provide some sort of reinforcement.
8. Applicant argues that no other building blocks have a stamped exterior surface.
9. Examiner respectfully disagrees. The exterior wall is a building block. Stamping a block to achieve a visual effect is notoriously well-known in the art. and would not distinguish the claims over the prior art.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALP AKBASLI whose telephone number is (571) 270-5348. The examiner can normally be reached on Monday through Thursday 7:30am to 6:00pm EST.
